

Euro 2020

Home Learning Challenge

When you see a football match on the TV, see how many different numbers you can spot on the players' shirts.

Have a football skills challenge with someone in your family. Put out some objects to dribble the ball around. Who can dribble around all of the objects and back to the start in the shortest time? You could time each other with a stopwatch/timer or by counting.

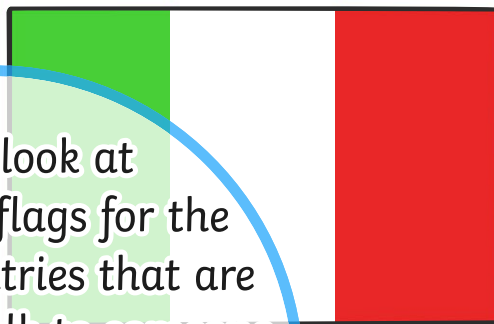

Malik went to see a football match. Spain scored 3 goals and Italy scored 5 goals. Which team won the game? How many goals were scored altogether?

How many words can you think of that rhyme with 'ball'? Write them in a list.

Have a look at some of the flags for the different countries that are taking part. Talk to someone in your family about them. What colours can you see? What shapes can you see? Which flag is your favourite?

Design a new football kit for your favourite team.
