

13.1.21

Multiplication and Division - Divide by 3

This is not a worksheet to print out. This is an on screen prompt to provide you with questions to aid your child's learning. The answers to these questions can be recorded using pencil and paper.

1. Write and complete the sentences using the representation to help you.

Complete the sentences.

There are 12 cubes.

There are plates.

Each plate has cubes.

12 divided into equal groups is

2. Mo has 15 pencils.

He shares them equally into 3 pots.

How many pencils will there be in each pot? Write your answer on your sheet of paper.

3. Complete the bar model to show 33 divided by 3 equals 11 (Split the bottom bar into the correct amount and add the correct value to each segment).

4. Numbers that follow each other when you count are called consecutive numbers. Three consecutive numbers can form a staircase. Here is 4, 5 and 6.

When you add 3 consecutive numbers, the total can always be divided equally by 3.

Is this correct. Talk to a family member about this and try it for yourself. Write your response on your paper sheet.
