

Two of these calculations will include an exchange.

$$7,155 + 2,543 =$$

$$\begin{array}{r} 6 \quad 7 \quad 5 \quad 3 \\ + \quad 2 \quad 5 \quad 2 \quad 6 \\ \hline \\ \hline \end{array}$$

$$\begin{array}{r} 4 \quad 2 \quad 8 \quad 3 \\ + \quad 3 \quad 4 \quad 4 \quad 6 \\ \hline \\ \hline \end{array}$$

$$3,752 + 6,341 =$$

Add two 4-digit numbers – one
exchange

False

Three of the calculations will require an exchange.
